

MultimapReversible  
::toString

```
graph LR; A[MultimapReversible::toString] --> B[multimap::toString]
```

A diagram showing a mapping from a trait method to a concrete implementation. On the left, a gray rectangular box contains the text 'MultimapReversible' on the top line and '::toString' on the bottom line. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'multimap::toString'.

multimap::toString
